	assessment Sterilization (female) Sterilization (male) IUD Implant Injectable Pill Condom (Male) Condom (Female) Emergency Contraception	Sterilization (female)						

	Value	Source	Year					
Percentage of primary SDPs that have at least 3 modern methods of contraception available on	day of assessment		•					
	75%	UNFPA SDP Survey	2020					
Percentage of secondary/tertiary SDPs with at least 5 modern methods of contraception available on day of assessment								
	79%	UNFPA SDP Survey	2020					

Contraceptive Discontinuation Rates and Method Switching (first 12 months)**									
	IUD	Implant	Injectable	Pill	Condom (male)	Source			
Discontinuation while in need									
Discontinuation while not in need									
Total discontinuation (all reasons)									
Switching to a different method									

Contraceptive Services and Decision-Making

	Value	Source	Population					
Method Information Index**	'							
	37%	2016-17 DHS	All Women					
Percentage of women who received family planning information during a contact with a health service provider **								
	17%	2016-17 DHS	All Women					
Percent of current modern contraceptive users who last obtained their family planning method from each source (All Methods) **								
Public	52%							
Private Medical	34%	2016-17 DHS						
Other	14%							
Percentage of women who decided to use family planning alone or jointly with their husbands/	partners **							
	92%	2016-17 DHS						

Investment in Family Planning

	Value	Source	Year
Annual expenditure on family planning from government domestic budget (USD \$)			

Traditional Contraceptive Use

Source : Family Planning Estimation Tool (FPET)

Traditional Contraceptive Use did not meet the reporting threshold (tCP among Married Women >5% in 2023) and so is not reported for this country.

radiational contract part ose and not meet the reporting amesional feet among married women 25% in 2023) and 30 % not reported joi this country.
