

Blue Ventures Commitment

Narrative

In India, we currently support one partner to improve access to rights-based family planning services for 16,000 people. By 2030, we plan to expand this support to improve access to 60,000 people by providing technical and capacity building support, as well as subgrants, to our in-country partner.

In Indonesia, we are working with two key partners who promote family planning services for coastal communities for around 2,100 people. By 2030, in line with the country's national health strategy, we plan to expand our partnership with 5 local organizations to support more than 10,000 people in accessing FP services. To achieve this, we will provide technical capacities and shared resources with partners.

In Mozambique, we are collaborating with two key partners to improve access to family planning services for about 8,000 people. By 2030, we plan to reach about 50,000 people with FP services through financial, technical and capacity building support to existing as well as new partners.

In Kenya, we are hoping to kick-off a partnership in 2022 with one of our key partners and the MOH to improve access to FP services for about 21,000 vulnerable people in the South Coast. By 2030, in line with the Country's FP 2030 commitment, we hope to have scaled access to FP services to about 50,000 people, through supporting the Ministry of Health in capacity building and offering technical and financial support.

In Madagascar, we are currently working within a network of partners improving access to FP services from a total of 944 service delivery points (Health facilities, mobile clinics and CHWs) serving about 646,000 coastal people. By 2030, we hope to increase the number of FP service delivery points to about 1,500, reaching about 1,000,000 people.

In Tanzania, we are currently working with two key partners in natural resource management, serving a population of 395,000 people. In the future, we hope to integrate H-E services and improve access to FP for the 395,000 people by 2030.

Outcome

Outcome 1: (Increase) Number of people accessing FP services in the seven listed countries from 672,100 to 1,536,000

Outcome 2: (Increase) Number of service delivery points offering FP services from 1,192 (944 in Mada, 37- India, 111 Indonesia (95 Health ambassadors 16 facilities) in 2022 to 1700 (increase by 508 SDPs) by 2030
