	Pill	 _ Year
Short-Term	Condom (Male)	
Methods	Condom (Female)	 _
	Emergency Contraception	 _
	Other modern methods	 _

	Value	Source	Year
Percentage of primary SDPs that have at least 3 modern methods of contraception available on day of	of assessment		
Percentage of secondary/tertiary SDPs with at least 5 modern methods of contraception available or	day of assessment		

Contraceptive Discontinuation Rates and Method Switching (first 12 months)**										
	IUD	Implant	Injectable	Pill	Condom (male)	Source				
Discontinuation while in need										
Discontinuation while not in need										
Total discontinuation (all reasons)										
Switching to a different method										

Contraceptive Services and Decision-Making

	Value	Source	Population
Method Information Index**			
Percentage of women who received family planning information during a contact with a health service	ce provider **		
Percent of current modern contraceptive users who last obtained their family planning method from	each source (All Methods)		
Public			
Private Medical			
Other			
Percentage of women who decided to use family planning alone or jointly with their husbands/partn	ers		

Investment in Family Planning

	Value	Source	Year
Annual expenditure on family planning from government domestic budget (USD \$)			
	\$ 89,456	FPSA	2021

Traditional Contraceptive Use

Source : Family Planning Estimation Tool (FPET)

Traditional Contract	dutional Contraceptive ose did not meet the reporting threshold (tCF among Marined Women 25% in 2022) and so is not reported for this country.									
2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
All Women	All Women									
Married Women	Married Women									
Unmarried Women										

Notes

- --- indicates no data post 2012 was available
- * Total Users among Married Women and Unmarried Women will not sum exactly to the Total Users among All Women
 ** Additional diaggregation or details available in the full data set.

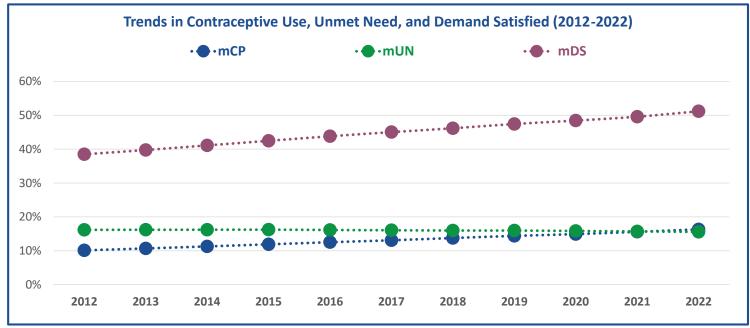

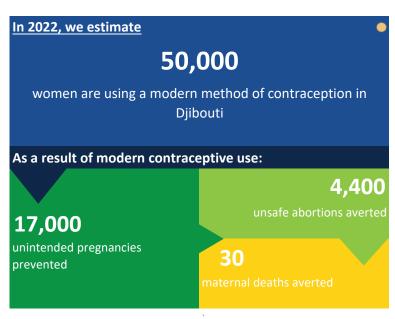

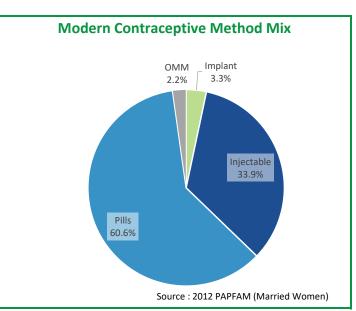

Djibouti

FP2030 Country Fact Sheet - 2022

	Estimate for 2012	Estimate for 2022
Total Users of Modern Contraception	25,000	50,000
Modern Contraceptive Prevalence Rate (mCP)	10.1%	16.3%
Unmet Need for Modern Contraception (mUN)	16.2%	15.6%
Demand Satisfied for Modern Contraception (mDS)	38.5%	51.2%

Data recency: color indicates year of most recent data used to inform estimates

New : After 2017
Recent : 2012 to 2017
Old : Prior to 2012

Note: the population for all indicators is all women of reproductive age (15-49) unless otherwise noted.
