

# Uganda Youth Alliance for Family Planning and Adolescent Health (UYAFPAH) Commitment

## Narrative

Uganda, we do rights-based, evidence-based and issue-specific advocacy to young people and communities with information on Family Planning and Reproductive Health, using existing policy guidelines. By 2030, with Adult Partners RHU, SAMASHA and MOH, we expect to have strengthened support for implementation and domestication of approved and exiting policy documents on Adolescent Health and have the Adolescent Health Strategy in place and in operation in the country, as a way of mitigating and reducing the teenage pregnancy rates and increase access to modern contraceptive commodities.

## Outcomes & Values

- Have or expedite the approval of the Adolescent Health Strategy.
- Expedite the reduction of Teenage Pregnancy and Child marriages in Uganda.
- Increase FP commodity uptake by the Youth.
