

# Commitment Checklist

## INTRODUCTION

Whether you are a civil society, youth-led, academic, multilateral or funding organization, or from the private sector, by making a commitment to FP2030, you will join a global community of leaders, experts, advocates, and implementers who are working together to address the most challenging barriers to expanding access to modern contraceptives.

Before submitting your commitment, please review the checklist at right to ensure your commitment is as strong as it can be.

We also recommend reviewing the resources developed to support non-state partners during the commitment-making process.

- Does your commitment align with the 2030 partnership's vision?**
- Does your commitment follow the guiding principles?**
- Is your commitment ambitious and achievable in the specified timeframe?**
- Have you developed your commitment using the best available evidence and data?**
- If your commitment implementation is taking place in a partner country (or countries), have you consulted with relevant governments to ensure alignment with their goals? Have you consulted with other local actors in the development of the commitment (civil society, faith leaders, young people, etc.)?**
- Have you explored a potential launch of this commitment in tandem with partner country (or countries)?**
- Do you have an internal system in place to track progress against your commitment?**
- Can your organization commit to participating in an annual accountability process?**
- Are you interested in connecting with other organizations doing similar work?**
