

INNOVA Health Supplies Commitment

Narrative

INNOVA HEALTH SUPPLIES has succeeded in improving access to contraceptive methods for Partner Organizations in the Latin American region. Our goal for the next five years is to double the number of civil society organizations that benefit from our market offerings in terms of the most economical prices and most efficient delivery times. In the same way we aim to innovate, through the creation and development of private label brands to improve and increase access and availability of inventory in our collection of reliable, best quality, and uniquely developed methods for the social market. We estimate that with the development of private brands in the oral and injectable categories, we will positively impact 100,000 women in the first year of launch.
